

It Girls is a hilarious new pop musical about a girl group who reunite fifteen years after a dramatic split. Featuring some of Toronto's funniest sketch and improv comedians, this campy Fringe comedy has it all - fame, friendship, forbidden romance, girl power, and Showgirls-esque sabotage! Best of all, *It Girls* features original comedy pop songs that will be stuck in your head for waaay too long.

2004. The It Girls are the biggest girl group in the world, until lead singer Lisa Jibb (**Emily Richardson**) abruptly quits the band to pursue a solo career. Millions of fans are left devastated. It's the end of an era.

Present Day. Lisa's finally sober, and (somewhat) together after fifteen years of rehab, rejection, and reality TV appearances. Instead, it's her former best friend and bandmate, Sloane Jetta (**Aba Amuquandoh**), who rocketed to pop superstardom.

Now, thanks to a viral Reddit petition, the It Girls are reuniting for one night only! All four members, including "Sexy Baby" Kelly D. (**Erica Gellert**) and Kelly K. aka "The Smart One" (**Devon Henderson**), will perform to a sold out Toronto stadium!

But will Sloane and Lisa move past their issues and focus on the music? Will the Kellies be able to control their scintillating sexual tension? Will the choreographer (**Tom Hearn**) and manager (**Marshall Lorenzo**) remain professional and not lower themselves to nefarious sabotage? The answer is obviously no. 100% no.

Directed by Second City alum and *She The People* star **Ashley Comeau**, and featuring an infectious pop soundtrack (written by actor/writer **Emily Richardson** and **Ayaka Kinugawa**) that skewers celebrity, feminism, dating, partying, and the complexities of female friendship, *It Girls* is bold, hilarious fun.

It Girls is what would happen if *Josie and the Pussycats*, *Crazy Ex-Girlfriend*, and *Rupaul's Drag Race* had a baby. Don't you wanna meet that baby?!
