PRESS RELEASE:

A POST-THEATRE DIGITAL FANTASY

Summary:

Post-Humanum investigates future imaginings in which humans, robots and AI merge.

Description:

What will our possible futures look like? Collectifbus123 invites you in to the lo-fi take on a hi-tech world in which old gods compete for your love, humans sing a medley of songs about robots and last words drift in from humanoids a far galaxy a millenia away.

This roller-coaster show will take you to a future you may never have dreamt of where humans, robots and AI merge. This is the unusual, raucous result. Join us in this phantasmagorical funhouse.
